Java Maven Compile Only Changed Files

If you want to compile only changed Java files, you can use
`<useIncrementalCompilation>false</useIncrementalCompilation>` as follows:

```xml
1    <plugin>
2          <groupId>org.apache.maven.plugins</groupId>
3          <artifactId>maven-compiler-plugin</artifactId>
4          <version>3.2</version>
5          <configuration>
6                <source>1.6</source>
7                <target>1.6</target>
8                <useIncrementalCompilation>false</useIncrementalCompilation>
9          </configuration>
10   </plugin>
```
